OVATION™

MASTIC
HOME EXTERIORS

true to life

Ovation Double 4" in Wicker

No paint. No stain. No hassles. That's the beauty of Ovation.™ Available in 20 colors and four panel styles, Ovation is engineered for strength and durability. Our exclusive Snap+Lock+Hold™ Locking System keeps panels in place — even during high winds. With vivid color throughout, and strength across the board, Ovation more than earns its name.

Test our vinyl. We do. Rigorously. Relentlessly.

WEATHERING Color retention (resistance to fading) is tested by subjecting Mastic products to real-time weather conditions and accelerated UV testing. This ensures that Mastic products will hold up in the most extreme environmental conditions.

OIL CAN TEST Siding panels are placed under heat strips and saturated to 120° — 140°F to make sure the siding doesn't warp or buckle.

RIGIDITY Panels are designed and engineered to be more rigid so siding remains straight on the wall.

GLOSS TEST A digital readout microgloss meter is used to scan siding to determine if its gloss falls within a target range. Gloss is important to the aesthetic appeal of the siding.

COLOR READ TEST Using a spherical spectrophotometer, a 10,000-watt xenon flash tube bounces light off siding panels. This information is then analyzed to determine if the color falls within accepted ranges for consistency and match.

VERTICAL HEIGHT IMPACT TEST Measures the product's durability and ability to resist impact forces — the result of proper thickness, formulation and impact modifiers.

Ovation Double 4" in Tuscan Olive

Time-tested. VSI certified. And more.

The Vinyl Siding Institute (VSI) is dedicated to assuring vinyl siding delivers maximum performance in every application. Mastic vinyl siding products meet or exceed ASTM D3679 performance standards in the VSI certification program.

ASTM D3679 was developed by consensus through ASTM International, one of the largest standards development organizations in the world. Vinyl siding that meets this ASTM standard will:

VSI	MASTIC
WITHSTAND THE IMPACT OF RECOMMENDED INSTALLATION PROCEDURES.	Mastic siding is designed and engineered to withstand impact beyond that required by ASTM D3679.
STAY ON THE HOUSE IN HEAVY WINDS OF AT LEAST 110 MPH.	Ovation is rated at up to 195 mph.
LAY STRAIGHT ON A FLAT WALL AND NOT BUCKLE UNDER NORMAL CONDITIONS.	Our product development team subjects Mastic products to a battery of rigorous tests to ensure superior quality and performance and, in addition to lay-flat design features, some Mastic products are even designed to hide existing imperfections in construction.
WITHSTAND THE EFFECTS OF NORMAL SEASONAL TEMPERATURE FLUCTUATIONS.	With our exclusive Duranyl 5000® Protection System and Hang-Tough™ Technology, Mastic products are engineered to persevere in the most extreme conditions.
MEET MANUFACTURERS' ADVERTISED SPECIFICATIONS FOR LENGTH, WIDTH, GLOSS AND THICKNESS — AND HAVE A MINIMUM THICKNESS OF .035.	Ovation features a premium thickness of .042 — 20% thicker than the minumum requirement.

Ovation Double 4' in Scottish Thistle

MASTIC V.I.P. LIMITED LIFETIME WARRANTY
Premium guarantee of lasting quality and peace of mind — backed by Mastic, a trusted industry leader for 50+ years (see warranty for complete details).

THE .042 COLOR LEADER — 20 COLORS

SNAP+LOCK+HOLD™ LOCKING SYSTEM
Grips tight so panels lock securely and stay put — even in high winds.

ROLLOVER, REINFORCED NAIL HEM
Easier installation — more precise and secure fastening.

9/16" PANEL PROJECTION
Enhanced shadow lines replicate the appearance of real wood siding.

.042 THICKNESS
Greater strength, greater rigidity and a panel that hangs straighter.

WIND SPEED — RATED UP TO 195 MPH
Mastic's proprietary design and engineering delivers a panel that achieves superior wind resistance.

DURANYL 5000® PROTECTION SYSTEM
Proprietary technology adds extra UV protection to our deepest, most vivid colors — protects color against harsh elements and maximizes long-term weatherability.

MASTIC HANG-TOUGH™ TECHNOLOGY
Exclusive formulation and process boosts durability so panels are more resistant to cracking, impact and thermal distortion. As an added benefit, rich color resides throughout the panel — virtually eliminating the appearance of nicks and minor surface scratches.

CLASS 1(A) FIRE RATING

A HEALTHY RESPECT FOR THE PLANET — AND OUR CUSTOMERS.

Everything we do, big and small, revolves around our respect for our customers — and the environment. We're committed to zero-waste manufacturing, process optimization, sustainability, recycling and the conservation of energy and water. In fact, we put sustainable practices to work at every stage of our process — engineering, testing, product development, manufacturing, transportation and beyond.

HEALTH AND SAFETY
Does not utilize materials that can cause adverse health effects to installers and to you.

EMBODIED ENERGY
Requires less energy to manufacture per square foot than fiber cement or brick.

ENGINEERED FOR SUSTAINABILITY
Potential to earn more points in leading green building certification programs and contributes significantly less to global warming than other exterior cladding.

MATERIAL EFFICIENCY
Generates less on-site construction waste than cardboard packaging, brick or lumber.

Unlike some fiber cement products, vinyl siding does not produce harmful silica dust — silica dust can cause lung disease.

BREATHE EASY

Genuine Mastic. First in home exterior products.

Only the best. Mastic Home Exteriors is your solution for the finest-quality vinyl siding products and our exclusive Designer Accents™ collection of finishing accessories. Shutters. Decorative door and window mantels. Corner posts. Blocks and vents. Columns and gutters. All designed to perform — and coordinate — perfectly with your Mastic siding. For uncompromising quality, beauty and performance, insist on a complete exterior by Mastic Home Exteriors.
